

# REMOTE DISPLAY USER MANUAL

**NETWORK SOFTWARE, REMOTE DISPLAY CAN GENERATE THE DISPLAY OF RANKINGS AND TRACKING ON TV OR PC SCREENS ON 10 DIFFERENT CHANNELS AND SIMULTANEOUSLY.**

**THIS SOFTWARE CAN WORK LOCALLY, THAT IS WITH ELITE V3 ON THE SAME COMPUTER, OR NETWORK (RJ45).**

**DISPLAY SETTINGS ARE SPECIFIC TO A FOLDER, AND SPECIFIC TO A TYPE OF RACE (BEST LAP RANKING, NUMBER OF LAPS, ETC.). SO, YOU NEED TO GO INTO THE FOLDER SETTINGS TO MANAGE THE DISPLAY.**

# REMOTE DISPLAY

## HOW DOES THE SOFTWARE WORK WITH ELITE V3

### STEP 1 : ENABLE CHANNELS

In **ELITE V3**, you must **ENABLE CHANNEL 1**. Here, we manage a single channel.

The screenshot shows the Elite V3 interface with a 'Folder settings' dialog box open. In the background, a 'Competitors list' table is visible:

No.	Name	Nationality	Federation	License	Category	Model
...	...	FRA	...	182241	Pro-Am	Porsche Cayman C
...	...	FRA	...	28512	Am	BMW M4
...	...	FRA	...	224834	Am	Ginetta G55
...	...	FRA	...	161964	Pro-Am	Audi R8 LMS
...	...	FRA	...	19919091...	Pro-Am	Ginetta G55
...	...	FRA	...	47982	Pro-Am	Ginetta G55
...	...	FRA	...	57682	Am	BMW Ekrts M4
...	...	ESP	...	8	Am	Audi R8 LMS
...	...	FRA	...	37186	Pro-Am	Porsche Cayman C

In the 'Display TV' window, the 'Enable this channel' checkbox is checked and highlighted with a red box.

### STEP 2 : CHANGE THE LOCAL PORT NETWORK

By default, the local port network used is **14000**. You can change it if the port was already being used by another application.

The screenshot shows the Elite V3 interface with the 'Settings' menu open. The 'Display TV' dialog box is open, and the 'Local port' field is set to 14000, highlighted with a red box. The dialog also shows a track diagram with various sectors labeled (T1, T2, T3, T4, T5, T6, T7, IN, OUT).

## HOW DOES THE SOFTWARE WORK WITH ELITE V3

### STEP 3 : WINDOWS DISPLAY SETTINGS

To have your display on a computer screen connected to the **VGA, DVI** or **HDMI** port from your computer, right-click on the desktop of your computer and choose **DISPLAY SETTINGS** and **EXTEND THESE DISPLAYS**.

Your computer screen with icons (screen 1)

Your 2nd screen without icons

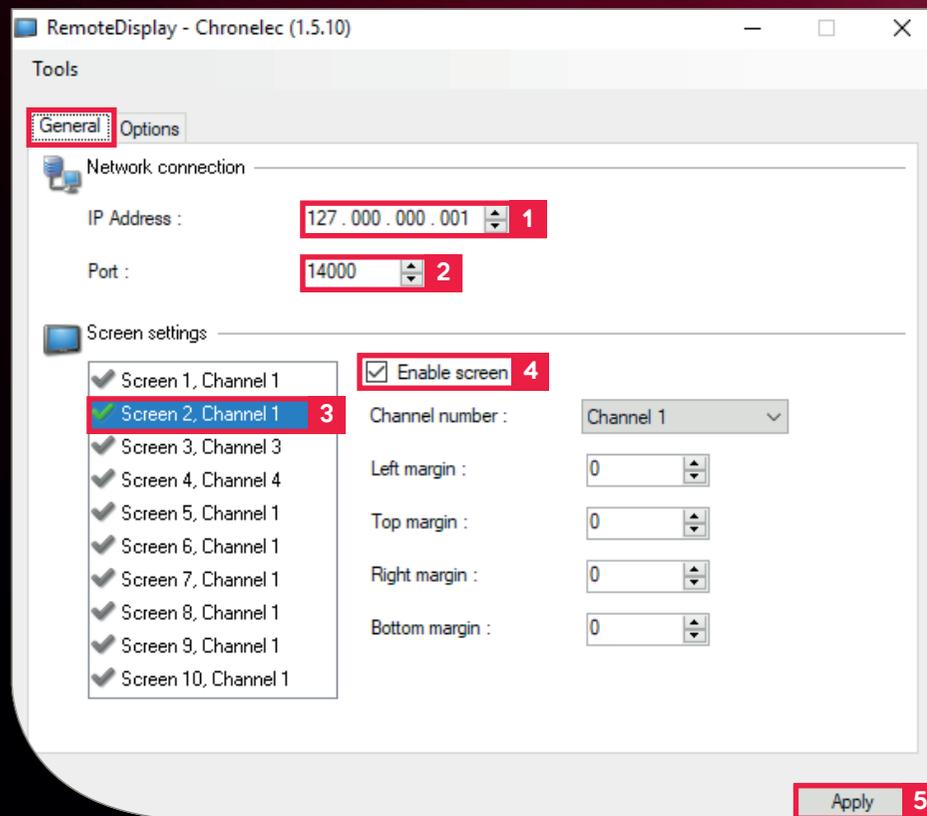

# REMOTE DISPLAY IN THE REMOTE DISPLAY SOFTWARE

## STEP 4 : IP ADDRESS AND REMOTE PORT

You must use the **IP address 127.000.000.1** and the **remote port 14000** (the same is entered in the **ELITE V3** software) and select **CHANNEL 1** which was validated in **ELITE V3**. Fill the **screen number** (in Windows, see on previous page) and in this example, **Screen 2**.

**CHECK THAT THE 'ENABLE SCREEN' BOX IS STILL CHECKED.**

Validate your settings by clicking on **APPLY**.

Once your settings are applied, this wallpaper will appear on your 2nd screen :

When you enter a race in **ELITE V3**, this type of display will appear :

13:43:33 FIM - SEWC Prestige - 3rd Final										
Pos.	N°	Nat	Nom	Véhicule	31 (1) 20.457	32 (111) 17.320	Tps. tour	NT	Ecart 1er	
1	111		BLAZUSIAK Tadeusz		21.409	18.247	40.355	12	-

# REMOTE DISPLAY IN THE REMOTE DISPLAY SOFTWARE

## STEP 5 : CUSTOMIZE YOUR DISPLAY

In **OPTIONS** tab of REMOTE DISPLAY, you can customize your view using the menu **SELECT AN IMAGE**.

Then give the access pattern of the desired image by clicking on the icon **FOLDER**.  
Validate your choices by clicking on **APPLY**.

Settings, Green flag, Yellow flag, Stop Race... displays an image on your screen 2 automatically when ordering **ELITE V3** software. Example below with a Green flag :

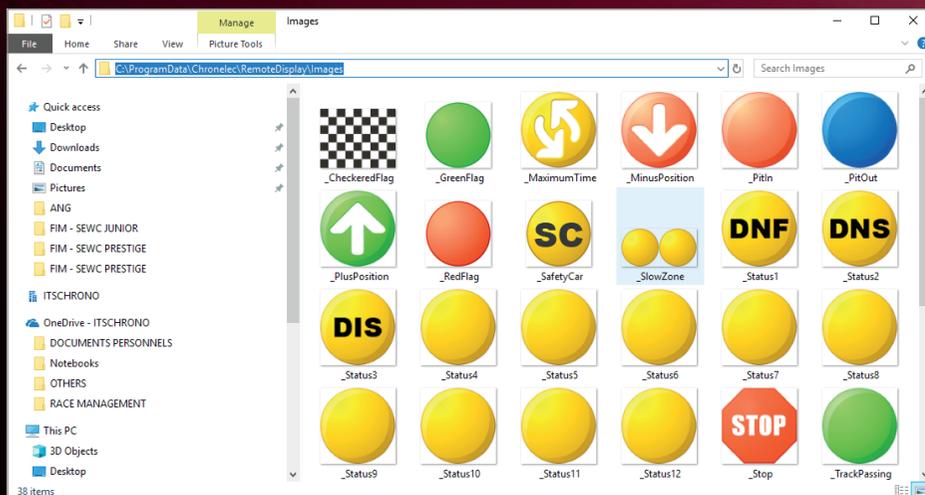

# REMOTE DISPLAY

## THE MULTIPLE POSSIBILITIES OF THE SOFTWARE

### PREDEFINED IMAGES

In the default directory [ C:\ProgramData\Chronolec\RemoteDisplay\Images ], you will see the content of the folder **IMAGES** which provides a large number of predefined images :

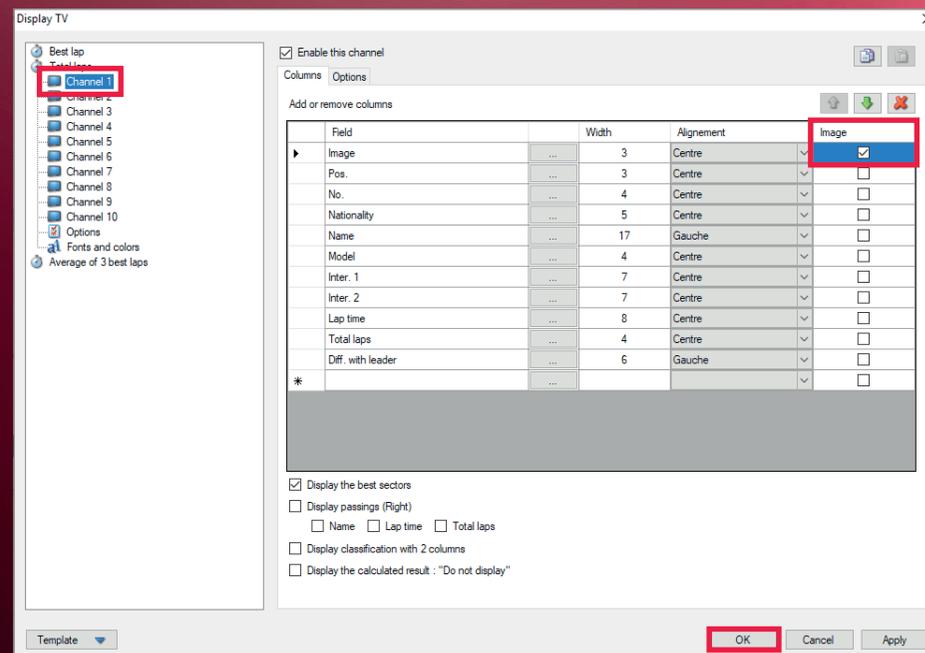

**NB :** The default software images preceded by a [ \_ ] as [ **\_PitIn.png** ] can be modified but must remain exactly the same heading because these are automatic and direct links related with software commands in **ELITE V3**.

To change or add images, always store them in the same folder in **.PNG**

### DISPLAY OF IMAGES ON SCREEN 2

To display images on the **screen 2**, you must first, in the display settings of **ELITE V3**, select **IMAGE** :

# REMOTE DISPLAY

## THE MULTIPLE POSSIBILITIES OF THE SOFTWARE

### ASSIGN AN IMAGE TO A FIELD

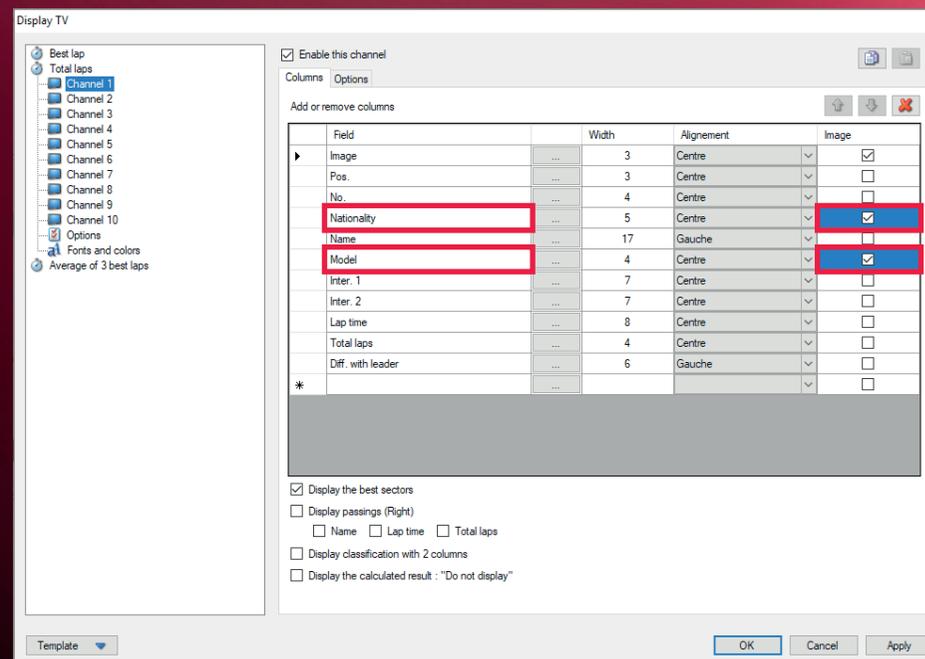

If you want to display images, place [ .PNG ] files in the **IMAGES** folder of the **REMOTE DISPLAY** software. These images will have to be named in the same way as what is indicated in **ELITE V3**.

In the example below, the [ **NATIONALITY** ] and [ **MODEL** ] fields have an assigned image. For the competitor [ **N° 111** ], its fields [ **NATIONALITY** ] and [ **MODEL** ] are filled with [ **POL** ] and [ **KTM** ]. The images in the folder must therefore also be named this way.

16:36:44 FIM - SEWC Prestige - 3rd Final									
Pos.	No.	Nationality	Name	Model	Inter. 1 (1) 20.457	Inter. 2 (11) 17.320	Lap time	Total laps	Diff. with leader
1	111		BLAZUSIAK Tadeusz		21.409	18.247	40.355	12	-
2	10		HAAKER Colton		21.420	32.126	54.137	12	22.716
3	1		WEBB Cody		21.262	21.492	42.754	12	28.896
4	13		TARRES Poi		27.837	25.496	53.333	11	1 Lp.

Check the **IMAGE** boxes in the **ELITE V3 DISPLAY SETTINGS**.

When **ELITE V3** software sends information to **REMOTE DISPLAY**, the software will point to the corresponding image if it exists in the **IMAGES** folder and display it.

**THIS EXAMPLE IS VALID FOR ALL OTHER FIELDS IN ELITE V3 SOFTWARE.**

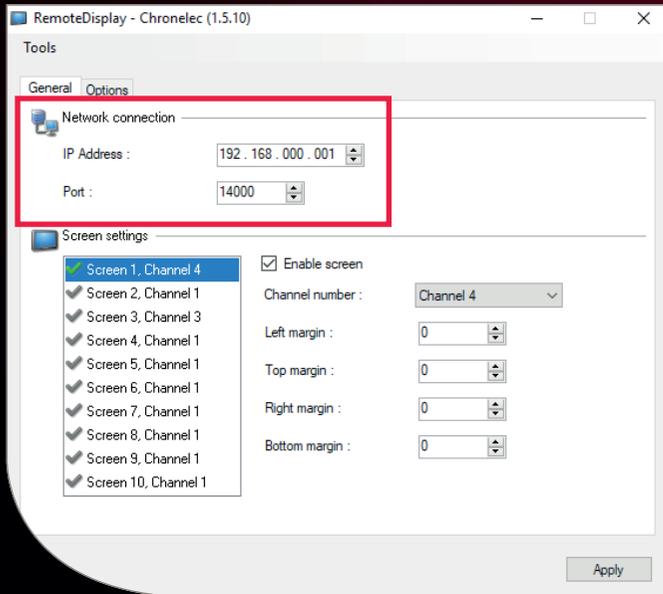

# REMOTE DISPLAY

## NETWORKING : MULTI-USER CONFIGURATION

All the features of a multi-user configuration remain the same as those of a local configuration. In the example below, the **TIMING COMPUTER** uses the **ELITE V3** software and has activated the **10 TV display channels** (see step 1). The other 3 computers, being on the same network, can therefore display one or more of these 10 channels thanks to the **REMOTE DISPLAY** software.

THE IP ADDRESS MUST BE THE ONE OF THE COMPUTER THAT SENDS THE TV DISPLAY INFORMATIONS ON THE NETWORK (TIMING COMPUTER), AND THE PORT MUST CORRESPOND TO THE ONE FILLED ON THE TIMING COMPUTER IN STEP 2 (IN THIS CASE 14000).

**TIMING COMPUTER**  
ELITE V3 - MANAGEMENT DISPLAY

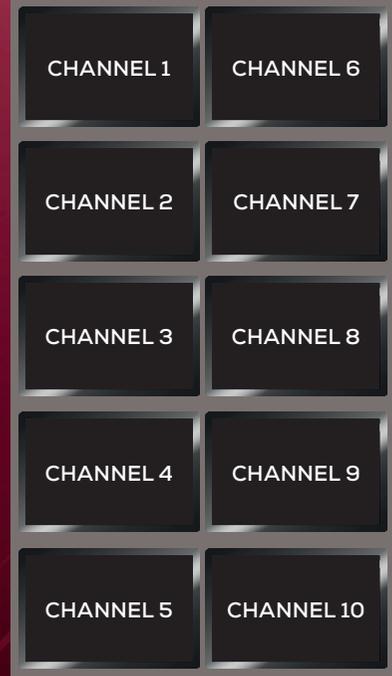

THIS COMPUTER SENDS ON **PORT 14000** ALL THE TV DISPLAY INFORMATIONS (SEE STEP 2).

RJ 45

VIA THE **REMOTE DISPLAY**, EACH PC CAN DISPLAY ONE OR MORE CHANNELS.
