CONTACT US

Tailored coaxial cable length. 2 types of cables to choose from :

- RG223 double shielding
- RG58 simple shielding

RF AUTONOMOUS SUITCASE KIT

FOR RF ACTIVE LOOP.

It is used to power an RF active loop to make it independent of the RF decoder. Autonomy of 48h minimum. Waterproof. LCD display showing real-time battery voltage information.

This kit includes :

- 1 suitcase
- 1 battery
- 1 charger
- Connections

REF. ITSVA-BARF

LOOP DOUBLER OPTION

REF. ITSDB

FOR PASSIVE LOOP.

If you need to connect the same loop on two different decoders, you can use our loop doubler provided for this purpose.

INFORMATION

It is recommended to refer to the installation diagram corresponding to your installation for optimal implementation and conformity of uses. Available free of charge on our website.
