CONNEXION DU DÉCODEUR POUR LE PARAMÉTRAGE

PARAMÉTRAGE DU LOGICIEL

Pour paramétrer le décodeur, il vous faut télécharger le logiciel **ITS DECODER IP PARAMETER** disponible sur notre site.
Une fois le logiciel téléchargé, remplissez les champs comme tel :

The screenshot shows the 'ITS DECODER IP PARAMETER' software interface. The window title is 'USR-MO V2.2.3.286'. The interface is divided into several sections:

- Operate Via LAN / Operate Via COM:** A table of discovered devices.
- Base Param (which is without j!, usually keep default):** Configuration fields for IP, HTTP Port, User Name, Password, Device Name, etc.
- Port Param:** Configuration fields for Parity/Data/Stop, Baudrate, Local Port, Remote Port, etc.
- Operation Log:** A text area showing the status of the connection.

The legend at the bottom right indicates that pink fields are 'NE PAS MODIFIER' (Do Not Modify) and green fields are 'DONNÉES MODIFIABLES' (Modifiable Data).

Device IP	Device Name	MAC	Version
192.168.0.101	COBRA	D4 AD 20 6B 2F 5B	4020

Base Param (which is without j!, usually keep default)

- IP Type j: Static IP
- ModuleStaticIP j: 192.168.0.101
- SubnetMask j: 255.255.255.0
- Gateway j: 192.168.0.254
- DNS Address: 0.0.0.0
- User MAC: D4 AD 20 6B 2F 5B
- Reset Timeout(s): 3600
- Clear Buffer Data Before Connected
- UART Set Parameter
- HTTP Port: 80
- User Name: admin
- Password: admin
- Device Name: COBRA
- Index
- Reset
- Link
- RFC2217

Port Param

- Parity/Data/Stop: NONE | 8 | 1
- Baudrate: 115200
- Module work mode: UDP Client
- Local Port: 2101
- RemoteIP: 192.168.0.255
- Remote Port: 2101
- Short Connection time: 3
- Tcp connect num: 4
- Short Connection

Operation Log
